Our country has afforded the opportunity as none other could have done. Our every advance and progression has been made possible by our customer friends, each one of them. it's a word about perennials

These past several months have been fine, and the quality of our perennial plant material is such that it will not be excelled anywhere. The list which you will find in these pages is all inclusive, representing everything that is really good in perennials.

The perennial plant field has advanced tremendously until at this time it is perhaps the most exclusive and specialized branch of the nursery business. We've always kept pace and you have our earnest assurance that we will continue to bring to you all that is really good in perennials, and that they will be kept generously available to all our customers at reasonable prices.

Gratefully,

Those who know Martin plants readily realize what this means to the buyer of perennial material. You know that the plants which you get from these fields are developed from the first small stage of propagation in the soil that suits them exactly. The careful testing that is constantly in process here, plus the co-operation of nationally known soil authorities, never fails to find just the right type of soil for the superior development of the perennials that are destined for you. You know, too, that perennials started like this are instilled with a tremendous vigor and terrific vitality that will make them transplant and grow successfully in almost any habitat you give them and with a minimum of care and attention.

A New Service - BOOKS

Modern Customer-Clientele Demands Quality Plants Grown by Modern Methods

The past generation has seen the culture of plants develop from one of native knack to a definite science. This is being brought more forcefully home each year. Realizing this, The Joseph F. Martin Co., as another phase of its policy of fine service, is bringing to its customers, for the first time this year, two up-to-the-minute publications by men renowned in their respective fields of plant culture.

Each year public institutions and individuals are spending money and accomplishing much to help us improve our methods and ultimately our product. CUT FLOWER IRIS

California Type

OCHRULEUCA

Recently it was brought to our attention that this type of Iris is of great value for cut flower purposes. We purchased our plants in California where for many years these Iris commanded high prices on the cut flower markets. When our plants were in full flower the first part of June, we sent a few bunches to the wholesale market and they immediately sold at a high price. All indications are that they will command a good price for many years. They are exceptionally hardy and will grow in fairly heavy or loamy soil; moisture is beneficial. We are pleased to offer you the following range of colors at attractive prices.

AN IMPORTANT CONSIDERATION IN THE SELECTION OF YOUR JAPANESE IRIS

For many years the trade throughout the country has recognized the unparalleled excellence of our Japanese Iris list, and the fine quality of our plants. This year again, the list is the best that can be had in Japanese Iris. Extremely important is the fact that we have been favored with the best possible weather and soil conditions for their perfect development. The most technical growing culture could not do for them what nature did in this past growing season. The Iris which we offer are not to be confused with over-aged, run-out material, much of which is being unloaded on the market at the present time. All of our Japanese Iris are without exception, young, vital, vigorous stock of a generous size, and will give you an abundance of flower the first season after planting—the perfect results which you have come to expect from Japanese Iris prepared for you by our nurseries.
